NOTES

Aborigines. Before an amendment to the Australian Constitution in 1967, it was provided by section 127 that 'in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted'. This provision was deleted following a referendum held on 27 May 1967 which resulted in a large majority of votes in favour of its repeal. The enabling Act, the *Constitution Alteration (Aboriginals) 1967*, came into operation on 10 August 1967.

The population estimates appearing in this publication for dates and periods from 30 June 1961 refer to total population, *i.e.* including Aborigines, except where otherwise indicated. Vital statistics which until 31 December 1965 excluded births, deaths and marriages of full-blood Aborigines, now include events among the total population. The term 'full-blood Aborigines', as used in relation to these statistics, is to be understood to mean persons with more than one-half Aboriginal blood.

A line drawn across a column of a table between two consecutive figures indicates a break in continuity in the series. Figures above the line exclude full-blood Aborigines; those below the line refer to total population, including Aborigines.

Rounding of Figures. Percentages appearing in tables in this publication have been rounded to the first (or second) place of decimals without making any adjustment which would be necessary to make the percentages so expressed add to precisely 100, or to the various sub-totals.

ESTIMATES OF POPULATION

EXPLANATORY NOTES

For dates other than those of the periodic census of population, estimates are based on records of births and deaths and of movements of population interstate and overseas. Estimates of the population of Australia and of each of the States and Territories are prepared by the Commonwealth Statistician as at 31 March, 30 June, 30 September and 31 December in each year. Because the available records of interstate movement are incomplete, these intercensal estimates as they apply to States and Territories are approximate and are revised when the results of the next succeeding census become known.

Until 1967, when a new method was introduced, the estimates were made by adding to the census figures the subsequent natural increase (the excess of births over deaths) and all net recorded overseas movement according to State of embarkation or disembarkation, as well as all net recorded movement by air, rail, sea and bus between States. The 1966 Census results confirmed that, despite very considerable efforts made to improve records of interstate movements, it is not possible to measure such movements with the desired accuracy. The new method, tested over the 1961-1966 intercensal period, appears to provide a more accurate result, and has therefore been adopted.

In the new method the population in each State or Territory is estimated by adding to the population ascertained at the Census the natural increase and the recorded net gain from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of residence under child endowment procedures or Commonwealth electoral procedures, supplemented by results of any special count or sample survey. Holiday, business or other similar short-term movements between States and Territories are omitted.

Population estimates for dates and periods between the Censuses of 30 June 1966 and 30 June 1971, in this publication, have been adjusted in accordance with the final results of the 1971 Census.

Mean Population. As stated earlier, estimates of population are prepared as at the end of each quarter of the year. The mean population of a quarter might be taken to be the average, or arithmetic mean, of the populations at the beginning and the end of the quarter. If a represents the population at the beginning of a year and b, c, d and e the populations at the end of the first, second, third and fourth quarters respectively, these quarterly means would then be $\frac{1}{2}(a + b)$ for the first quarter, $\frac{1}{2}(b + c)$ for the second, $\frac{1}{2}(c + d)$ for the third and $\frac{1}{2}(d + e)$ for the fourth quarter. The mean population for the year might then be taken as the arithmetic mean of the four quarterly average populations, or

$$\frac{1}{4} \left\{ \frac{1}{2}(a + b) + \frac{1}{2}(b + c) + \frac{1}{2}(c + d) + \frac{1}{2}(d + e) \right\}$$

which may be more simply expressed as $\frac{1}{8}(a + 2b + 2c + 2d + e)$. This method of deriving mean population had been in use in Western Australia prior to its general adoption by the 1903 Conference of Australian Statisticians. It was later superseded by the more precise measure

$$\frac{1}{12}(a + 4b + 2c + 4d + e)$$

which is now commonly used in Australian statistics. In order to establish uniformity with current practice, estimates of mean population for 1901 and later years have been revised, where necessary, by the application of this formula.

Age Distribution. The estimated age distribution is based on the ages of persons enumerated at the Census, natural increase derived from records of births and recorded ages at death, and details of internal and overseas migration. The Census figures show evidence of inaccuracies in statements of age, such as apparent preferences for certain ages. Adjustments have been made to allow for these inaccuracies.

The procedure used in preparing the estimates for 30 June 1972 differs from that used for annual age estimates prior to 1971 in respect of the treatment of net migration. Previously, net migration was assumed to possess the same age structure as Australian net overseas migration. For 1971-72, estimates of the age structure of net interstate migration and net overseas migration have been prepared separately. Age estimates for interstate migration were based on information available from recorded transfers of State of residence under child endowment procedures and Federal electoral procedures, and from surveys of internal migration. Age estimates of net overseas migration gain to each State or Territory were based on statistics of overseas arrivals and departures.

The estimates for 1972 are subject to revision in the light of the results of the next census of population.

The calculations of estimated age distributions have been made in units and the results shown in units without being rounded to tens or hundreds; it is to be understood that accuracy down to the unit is not claimed and should not be assumed.

SUMMARY

(a) See Explanatory Notes on page 5.

OVERSEAS MIGRATION

EXPLANATORY NOTES

In the tables in this section the term 'overseas arrivals' refers to persons arriving in Western Australia direct from an overseas country, and 'overseas departures' to persons departing from Western Australia direct to an overseas destination. Figures do not necessarily refer to persons who resided in Western Australia prior to departure or who intend to reside in Western Australia after arrival, as passengers may travel interstate before embarkation or after disembarkation.

The classification into 'permanent', 'long-term' and 'short-term' movement is based on information provided by the traveller on arrival in or departure from Australia. *These statements represent the traveller's intention at the time. Many travellers subsequently change their intentions and this must be borne in mind in interpreting the statistics.*

Permanent movement consists of persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad. *Settlers* are persons who, on arrival in Australia, indicated that they came intending to settle. *Former settlers* are persons who, on departure from Australia, stated that they had come to Australia intending to settle, had stayed for a period of twelve months or more, and were now departing permanently.

Long-term movement consists of the arrival of visitors and the departure of residents with the stated intention of staying (in Australia or in a country abroad, respectively) for twelve months or more, and the departure of visitors and the return of Australian residents who have stayed (in Australia or in a country abroad, respectively) for twelve months or more.

Short-term movement consists of all other arrivals and departures, including those of Australian troops irrespective of period of stay.

VITAL STATISTICS

EXPLANATORY NOTES

Reference is made on page 2 to the repeal, with effect from 10 August 1967, of section 127 of the Australian Constitution. As a consequence of this repeal, all vital statistics, which previously excluded births, deaths and marriages of full-blood Aborigines, now include events among the total population. Accordingly, all figures shown in this Section for periods from 1 January 1966 include particulars of Aborigines, those for 1965 and earlier periods remaining on the old basis.

A line drawn across a column in the tables between two consecutive figures indicates a break in continuity in the series. Figures above the line exclude full-blood Aborigines; those below the line refer to events among the total population, including Aborigines.

The Registration System. Compulsory registration of births, deaths and marriages in Western Australia was originally provided for by legislation of the year 1841. The Statutes currently in force are the *Registration of Births, Deaths and Marriages Act, 1961-1965* (State) and the *Marriage Act 1961-1973* (Commonwealth). For administrative purposes, the State is divided into twenty-seven Registry Districts, each having a District Registrar. Particulars of births, deaths and marriages reported to the District Registrars are sent to the Registrar-General at Perth, where a central registry office has been maintained since 1841.

Births are required to be registered within sixty days of the event, and must be notified by the father, the mother or the occupier of the premises where the birth took place.

Stillbirths are registered both as a birth and a death. From 1 January 1968 the term 'still-birth', for registration purposes, refers to a child of at least 20 weeks gestation not born alive. Previously it was restricted to cases where the period of gestation was at least 28 weeks.

Deaths are required to be registered within fourteen days. Notification must be given by the person who disposes of the body or by the occupier of the premises where the death occurred.

Marriages are celebrated according to the provisions of the *Marriage Act 1961-1973* (Commonwealth) by ministers of religion registered under the Act, or by District Registrars. Ministers are required to lodge a marriage certificate with the District Registrar for registration within fourteen days of the celebration of a marriage.

The Statistical Record. Statistics of births, deaths and marriages are prepared from the registration documents. Data concerning births and deaths exclude particulars of stillbirths which are shown separately. The numbers of births and deaths registered are classified according to local government areas and Statistical Divisions. The figures, however, do not necessarily represent the number of such events which actually occurred in a particular local government area or Statistical Division during each year, since births are allocated to the usual place of residence of the mother and deaths to the usual place of residence of the deceased. The statistics are compiled according to date of registration and not date of occurrence.

Causes of Death. The causes of death are classified in accordance with the *International Statistical Classification of Diseases, Injuries and Causes of Death* (Eighth Revision, 1965), operative from 1 January 1968. Particulars relate to the *underlying cause* which the World Health Organization has defined as '(a) the disease or injury which initiated the train of morbid events leading directly to death, or (b) the circumstances of the accident or violence which produced the fatal injury'.

Local Government Areas. In Western Australia, local government areas are designated Cities, Towns or Shires. In this publication, Cities are marked (C) and Towns (T), all other local government areas being Shires.

Changes in designation which affect the interpretation of statistics in this publication are listed below.

Shire of West Pilbara	The Shire of West Pilbara was constituted, with effect from 27 May 1972, by uniting the Shires of Ashburton and Tableland and by severance of territory from the Shires of Carnarvon, Roebourne and Upper Gascoyne.
Shire of East Pilbara	The Shire of East Pilbara was constituted, with effect from 27 May 1972, by uniting the Shires of Marble Bar and Nullagine and by severance of territory from the Shires of Port Hedland, Tableland and Wiluna.
Shire of Kent	The name of the Shire of Nyabing-Pingrup was changed to the Shire of Kent, with effect from 1 December 1972.

(a) Rates are based on census results and for years prior to 1966 exclude particulars of full-blood Aborigines (see Explanatory Notes on page 15). (b) Number of live births registered per 1,000 women in each age group. (c) The gross reproduction rate is a measure of the average number of female children who, according to the fertility rates on which the calculation is based, would be born to women during their lifetime. (d) The net reproduction rate is a measure of the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. (e) Based on 1946-48 mortality experience. (f) Based on 1953-55 mortality experience. (g) Based on 1960-62 mortality experience. (h) Based on 1965-67 mortality experience.

(a) From 1 January 1966 figures include particulars of Aborigines. For periods prior to 1 January 1966, full-blood Aborigines are excluded; see *Explanatory Notes* on page 15. (b) Rates for years prior to 1971 are based on final census results; those for later years are subject to revision after the next census. * Revised.

No. 29—Death Rates: Western Australia and Australia

Year	Crude death rate (a)		Standardised death rate (b)	
	Western Australia	Australia	Western Australia	Australia
1921	10.42	9.91	11.88	*10.58
1933	8.64	8.92	8.74	*8.62
1947	9.39	9.69	7.28	*7.34
1954	8.38	9.10	6.71	*6.90
1961	7.77	8.47	6.02	6.27
1966	8.13	9.01	6.25	6.53
1971	7.57	8.66	6.16	6.32

(a) Deaths per 1,000 of mean population. Figures for 1961 and earlier years exclude full-blood Aborigines. For 1966 and later years figures include events among the total population, including Aborigines. (b) Deaths per 1,000 of a standard population compiled by the International Statistical Institute, based upon the age and sex distribution of the population of 19 European countries at their censuses nearest to the year 1900. The rate is computed by applying to each sex and age group in the standard population, the death rates actually recorded in the corresponding groups of the State and Australian populations. Figures for 1966 and earlier years exclude full-blood Aborigines. * Revised.

(a) Average annual number of deaths at the specified ages during each three-year period per 1,000 of population in the corresponding age group at the relevant census. Figures for 1965-67 and later years refer to total population, including Aborigines. For 1960-62 and earlier periods full-blood Aborigines are excluded. (b) For age Under 1, figures shown for periods subsequent to 1953-55 represent infant deaths per 1,000 live births registered.

1971	7,478	1,904	9,382	9.09	20.3	1,571	16.7	4,520	48.2
1972	7,230	1,890	9,120	8.63	20.7	1,538	16.9	4,479	49.1

(a) From 1 January 1966, figures include particulars of Aborigines. For periods prior to 1 January 1966, full-blood Aborigines are excluded; see *Explanatory Notes* on page 15. (b) Rates for years prior to 1971 are based on final census results; those for later years are subject to revision after the next census. (c) Prior to an amendment to the Marriage Act in 1973, a minor was defined as 'a person who has not attained the age of twenty-one years'. The amendment, which came into operation on 1 July 1973, reduces the age to eighteen years.

DIVORCE

EXPLANATORY NOTES

This section contains statistics of dissolutions of marriage (commonly known as divorce), nullities of marriage and judicial separations.

The Commonwealth *Matrimonial Causes Act* 1959-1971 came into operation on 1 February 1961. The 1959 Act provided a uniform law throughout Australia with respect to divorce and other matrimonial causes, and superseded the Matrimonial Causes laws of the States and Territories except in so far as the transitional provisions of the Act kept them in force for the purpose of completing pending proceedings.

Under the *Matrimonial Causes Act* 1959-1971 a court may grant decrees of dissolution of marriage (commonly known as divorce), judicial separation, nullity of marriage, restitution of conjugal rights, and jactitation of marriage. Orders may be made for the custody and welfare of children, maintenance, the settlement of property, and damages for adultery.

The statistics in this section refer to petitions filed and final decrees granted for dissolution of marriage, nullity of marriage and judicial separation. Statistics of petitions filed relate only to the original petition in a suit, *i.e.* a cross-petition contained in an answer by the respondent is not taken as a separate petition, nor are the grounds cited in a cross-petition included.

A decree for dissolution of marriage is in the first instance a decree *nisi*. The decree automatically becomes absolute at the expiration of three months, unless it is in the meantime rescinded; appeal proceedings are instituted; or there are children of the marriage under the age of sixteen years, in which case the court must be satisfied that appropriate arrangements have been made for their welfare before the decree will become absolute. The parties cannot remarry until a decree *nisi* has become absolute. A decree of judicial separation is available on most of the grounds available for divorce. Statistics of decrees in this section refer to decrees *nisi* made absolute except for the following cases, where no decree *nisi* is granted.

- (i) Decrees of judicial separation, which do not dissolve the marriage and may be discharged on resumption of cohabitation.
- (ii) Decrees of nullity of void marriage, as distinct from nullity of voidable marriage. A void marriage is invalid because of failure to meet a legal requirement, and the original decree of nullity is final. A valid marriage is voidable on proof of one or more of the grounds set out in Section 21 of the *Matrimonial Causes Act* 1959-1971.

THE CENSUS OF POPULATION AND HOUSING

EXPLANATORY NOTES

Population censuses prior to the Commonwealth Census of 1911 were undertaken by the Governments of the several Australian Colonies. In the Western Australian Census it was the practice to exclude full-blood Aborigines from the tabulations. At the 1911 Census and later enumerations full-blood Aborigines were excluded from the tabulations in accordance with the requirements of section 127 of the Australian Constitution which provided that 'in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted'. This provision was deleted following a referendum held on 27 May 1967 which resulted in a large majority of votes in favour of its repeal. The enabling Act, the *Constitution Alteration (Aboriginals)* 1967, came into operation on 10 August 1967. The 1971 Census was consequently carried out as an enumeration of the entire population, including Aborigines. It has been possible to compile some data from the 1966 Census on the basis of total population (*i.e.* including Aborigines), and particulars have been incorporated, as appropriate, in the tables in this section.

With regard to the original provision, Commonwealth legal authorities were of the opinion that persons of the half-blood were not 'aboriginal natives' within the meaning of the Constitution, and *a fortiori* that persons of less than half Aboriginal blood were not Aboriginal natives. Accordingly, only persons having Aboriginal blood to a degree greater than one-half were excluded from the census tabulations.

Census Collectors' Districts. For the purpose of taking a population census, each local government area is subdivided (as appropriate) into areas known as collectors' districts.

A collector's district is an area which varies in size according to population density and physical characteristics and constitutes a suitable area for one collector to cover in the period allowed for the distribution and collection of census schedules.

Some statistics as presented in these tables are also available for each census collector's district, on request. The data may be interpreted by reference to maps showing collectors' districts contained in each local government area. These maps show the boundaries of each collector's district.

CENSUS, 30 JUNE 1971

Labour Force. The labour force comprises all persons aged fifteen years and over who, in the week prior to the Census, worked at all for payment or profit or were temporarily absent from their job. It also includes unemployed persons who were either laid off without pay for the whole week, or were actively seeking work. Unpaid helpers who usually worked less than fifteen hours per week and were not actively seeking work are excluded.

The term 'labour force' replaces the term 'work force' used in earlier Censuses.

Occupation. Occupation is defined as the nature of the work which a person performs, and implies *personal* performance. It may be based on the material treated, the process carried out or the type of service rendered by an *individual* worker. Thus the occupation of a person is the kind of work that he or she personally performs, as distinct from industry, which is defined as the *branch of productive activity, business or service carried out by the establishment in which a person is employed* and is not concerned with the nature of personal performance.

The Classification of Occupations used in the tabulation of the 1971 Census data has been adapted from and closely adheres to the principles embodied in the International Standard Classification of Occupations issued by the International Labour Office, Geneva, 1958 and as revised in 1968.

The Australian Classification of Occupations contains 11 Major Groups, 72 Minor Groups and 367 Occupation Categories. In accordance with the International Standard Classification, occupations have been grouped by the general similarity of the characteristics of the work they entail. The data appearing in Table 71 are restricted to the 11 Major Groups and the 72 Minor Groups. Complete descriptions of Major Groups, Minor Groups and Categories, together with a list of occupations included under each heading, are contained in the *Classification and Classified List of Occupations—Revised: June 1971*, published by the Commonwealth Statistician, Canberra.

Industry. For statistical purposes, industry may be defined as the branch of productive activity, business or service carried out by the establishment in which a person is employed. It is concerned with the activities of persons, firms or businesses considered as a group producing the same commodity, performing the same process or providing the same service. All persons engaged in any such branch of economic activity are classified industrially as belonging to that particular branch irrespective of their personal occupation within the industry. Examples are: Mining, which includes, in addition to miners and prospectors, such persons as laboratory technicians, transport workers and office staff employed by mining companies; Water Transport, which covers staff members of shipping companies and agencies, as well as ships' crews; professional activities such as Legal and Architectural Services which include not only qualified practitioners but also persons employed by them, for example, receptionists, law clerks and draftsmen.

Classification according to industry at the 1971 Census has been made on the basis of the 1969 preliminary edition of the *Australian Standard Industrial Classification*, prepared by the Commonwealth Statistician, Canberra. For the Population Census an 'undefined' category was added to certain Divisions of the classification to facilitate the coding of imprecise or generalised descriptions of industrial activities on the census schedules. The classification divides the labour force into 13 Divisions which, in turn, are divided into Sub-divisions, Groups and Industry Classes.

Urban, Rural and Migratory Population. At the 1971 Census a boundary was defined for each population cluster of 1,000 or more persons. These clusters are named 'urban centres' and the population enumerated in them is classified as urban for statistical purposes.

In determining the boundary of an urban centre with a population of 25,000 or more, all contiguous census collectors' districts which were found to have a minimum population density of 500 per square mile at the census were included. Some areas of lower density were classified as urban in accordance with certain other specified criteria. The term *Major urban* is applied to those centres which had a population of 100,000 or more, and supersedes the term *Metropolitan* as used at previous censuses. Urban Perth is the only such centre in Western Australia.

Around each urban centre with a population of at least 100,000 a further boundary was defined to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. This boundary delimits an area which is now, or is expected to be, in close social and economic contact with the urban centre. It is a fixed boundary, as distinct from the boundary of the urban centre which moves from census to census as urbanisation proceeds. In Western Australia, the area within this fixed boundary is described as the Perth Statistical Division.

Urban Perth at 30 June 1971 comprised the Cities of Fremantle, Nedlands, Perth, South Perth, and Subiaco; the Towns of Claremont, Cottesloe, East Fremantle, and Mosman Park; the Shires of Bassendean and Peppermint Grove; parts of the Cities of Melville and Stirling; parts of the Towns of Canning and Cockburn; and parts of the Shires of Armadale-Kelmscott, Bayswater, Belmont, Gosnells, Kalamunda, Mundaring, Swan, and Wanneroo. It covered an area of approximately 204 square miles, compared with 148 square miles (designated Perth Metropolitan Area) at 30 June 1966. The area of the Perth Statistical Division was 2,073 square miles.

In delimiting urban centres with a population of less than 25,000 persons all continuous urban growth is included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre.

A full description of the criteria adopted in the delimitation of urban centres appears in *Field Count Statement No. 7—Population: Local Government Areas and Towns, Western Australia* published February 1972 by the Commonwealth Statistician, Canberra.

Rural population represents persons enumerated in the area not included in urban centres. The term *Migratory* refers to persons (both passengers and crew) who, at midnight on Census night, were enumerated on board ships in Western Australian ports, or ships which had left an Australian port prior to Census night for a next port of call in Western Australia. It includes also those who were enumerated on long-distance trains, motor coaches or aircraft.

Statistical Divisions. The Statistical Divisions (and their component local government areas) referred to in this publication are shown on a map contained in *Statistics of Western Australia: Rural Industries*, the *Abstract of Statistics of Local Government Areas* and the *Western Australian Year Book*.

Local Government Areas. In Western Australia local government areas are designated Cities, Towns or Shires. In Table 76 Cities are marked (C), Towns (T); all other local government areas shown are Shires. The names and designations used in Table 76 are those which were current at 30 June 1971.

A number of boundary changes, many of them minor, occurred between the Censuses of 1966 and 1971. In some cases, however, a boundary change resulted in a change in the population of the local government area. In order to eliminate population changes due to boundary changes and to provide a comparison with the 1971 population figures, the 1966 local government area populations shown in Table 76 have been adjusted to the boundaries used in 1971.

In addition to boundary changes, some new Shires were constituted, some municipalities were amalgamated, and there were some changes of name or designation. These are listed below.

Melville, formerly a Town, was declared to be a City with effect from 3 May 1968.

The name of the Shire of Upper Blackwood was changed to the Shire of Boyup Brook, with effect from 30 May 1969.

The Town of Boulder was annexed to the Shire of Kalgoorlie with effect from 18 August 1969.

The name of the Shire of Kalgoorlie was changed to the Shire of Boulder, with effect from 12 December 1969.

The Shire of Bridgetown was united with the Shire of Greenbushes to form one municipality named the Shire of Bridgetown-Greenbushes, with effect from 26 March 1970.

The Shire of Donnybrook was united with the Shire of Balingup to form one municipality named the Shire of Donnybrook, with effect from 26 March 1970.

The Town of Midland was united with the Shire of Swan-Guildford to form one municipality named the Shire of Swan, with effect from 1 April 1970.

The name of the Shire of Donnybrook was changed to the Shire of Donnybrook-Balingup, with effect from 17 July 1970.

Canning, formerly a Shire, was declared to be a Town, with effect from 24 January 1971.

Cockburn, formerly a Shire, was declared to be a Town, with effect from 24 January 1971.

The designation and name of the Shire of Perth were changed to the City of Stirling, with effect from 24 January 1971.

Tables 60 and 61 show, for 1966 and 1971, a division of the population of each State and Territory into *Major urban*, *Other urban*, *Rural* and *Migratory*. The classification *Major urban* represents the population of the urban centres of Sydney (2,725,064 at 30 June 1971), Newcastle (255,162) and Wollongong (188,679), as well as part of Canberra (15,434), in New South Wales; Melbourne (2,394,117) and Geelong (115,181) in Victoria; Brisbane (818,423) in Queensland; Adelaide (809,482) in South Australia; Perth (641,800) in Western Australia; Hobart (129,928) in Tasmania; and part of Canberra (140,864) in the Australian Capital Territory.

In the intercensal period each of the States and Territories showed an increase in urban population, and all except the Northern Territory experienced a decline in rural population. In Australia as a whole, urban population increased by 1,296,448 (13.48 per cent) and rural population fell by 137,833 (7.02 per cent).

(a) Figures relate to the total population, i.e. including Aborigines; see *Explanatory Notes* on page 64. (b) Minus sign (—) denotes decrease. (c) The category British, as used in this table, comprises all persons who, by virtue of Australian legislation relating to nationality and citizenship, were deemed to be British subjects. It includes Australian citizens and citizens of other countries as specified in the legislation. Persons of Irish nationality are also included. (d) Figures for 1971 include persons whose nationality was not stated. At the 1966 Census, in such cases a selected nationality was allocated in accordance with other information on the Census schedule.

No. 70—Nationality of the Population (a): Percentage Distribution at Censuses, 1954 to 1971

n.a. denotes 'not applicable'.

(a) See notes *Statistical Divisions and Local Government Areas* on pages 65-6. Figures relate to total population, i.e. including Aborigines. (b) Minus sign (—) denotes decrease. (c) Comprises persons (both passengers and crew) who, at midnight on Census night, were enumerated on board ships in Western Australian ports, or ships which had left an Australian port before Census night for a next port of call in Western Australia. It includes also those who were enumerated on long-distance trains, motor coaches or aircraft.

No. 77—Population: Urban Centres and Bounded Localities: Censuses, 1966 and 1971

NOTE. Population clusters where 1,000 or more persons were enumerated at the 1971 Census are designated 'urban centres' and are marked (U) in the table below. The other areas shown are described as 'bounded localities'. In delimiting urban Perth special criteria were applied (see page 65). For areas other than urban Perth, boundaries were determined by examination of the most recent available aerial photographs in order to identify as closely as possible the periphery of the built-up area. Those centres which were found to have a population of more than 200 persons at the 1971 Census are included in the table.

Urban centres and bounded localities are listed alphabetically below. In the next table, they are arranged in descending order of population size as disclosed at the 1971 Census.

Urban centre or bounded locality	Population (a)				Intercensal increase or decrease (b)

n.a. denotes 'not available' or 'not applicable'.

(a) Figures relate to total population, i.e. including Aborigines.

(b) Minus sign (—) denotes decrease.

(c) Comprises population of urban centres of Rockingham-Safety Bay and Kwinana Industrial as delimited at the 1966 Census; incorporated into urban Rockingham at the 1971 Census.

(d) Described as Medina-Calista at the 1966 Census.

STATISTICAL SUMMARY

No. 79—Population at each Census Date, 1848 to 1971 (a): Western Australia and Australia

Date of Census	Western Australia			Australia	Western Australia	
	Males	Females	Persons	Persons (b)	Proportion of Australia (per cent)	Males per 100 females
1848—10 October	2,818	1,804	4,622	326,445	1·42	156·21
1854—30 September	7,779	3,964	11,743	671,743	1·75	196·24
1859—31 December	9,522	5,315	14,837	1,097,305	1·35	179·15
1870—31 March	15,375	9,410	24,785	1,606,057	1·54	163·39
1881—3 April	17,062	12,646	29,708	2,250,194	1·32	134·92
1891—5 April	29,807	19,975	49,782	3,177,823	1·57	149·22
1901—31 March	112,875	71,249	184,124	3,773,801	4·88	158·42
1911—3 April	161,565	120,549	282,114	4,455,005	6·33	134·02
1921—4 April	177,278	155,454	332,732	5,435,734	6·12	114·04
1933—30 June	233,937	204,915	438,852	6,629,839	6·62	114·16
1947—30 June	258,076	244,404	502,480	7,579,358	6·63	105·59
1954—30 June	330,358	309,413	639,771	8,986,530	7·12	106·77
1961—30 June	375,452	361,177	736,629	10,508,186	7·01	103·95
1966—30 June	432,569	415,531	848,100	11,599,498	7·31	104·10
1971—30 June	529,066	501,403	1,030,469	12,755,638	8·08	105·52

(a) Figures for 30 June 1961 and earlier exclude full-blood Aborigines; see *Explanatory Notes* on page 64. Those for 1966 and 1971 refer to total population, i.e. including Aborigines. (b) Figures for dates prior to 3 April 1881 are estimates.

No. 80—Estimated Population, Natural Increase and Migration (a)

NOTE. A line drawn across a column between two consecutive figures indicates a break in continuity in the series. Figures above the line exclude full-blood Aborigines; those below the line refer to total population, including Aborigines; see also Explanatory Notes on pages 2 and 15.

(a) Estimates for years prior to 1971 are based on final census results; those for later years are subject to revision after the next census. (b) Excess of births registered over deaths registered, including deaths of defence personnel, whether in Australia or overseas, between September 1939 and June 1947. (c) Interstate and overseas. (d) Minus sign (—) denotes decrease. (e) The rates represent total increase in population during the year expressed as a proportion per cent of the population at the end of the previous year. (f) At 31 December. (g) Not available.

* Revised.

(a) Rates for years prior to 1971 are based on final census results; those for later years are subject to revision after the next census.

(b) Excludes deaths of defence personnel, whether in Australia or overseas between September 1939 and June 1947.

(c) Excess of births registered over deaths registered; see also footnote (b).

(d) Deaths under 1 year of age; included in deaths registered.

(e) Per 1,000 live births.

(f) Not available.

(a) Includes statistics for individual local government areas.

(†) New issue.

NOTE. In addition to the preceding publications, a number of bulletins which deal exclusively with this State are produced by the Commonwealth Statistician, Canberra, who also issues many publications which contain particulars for Western Australia as a component of Australian totals. A complete list of all publications currently issued by the Central and the various State Offices of this Bureau appears in 'Publications of the Australian Bureau of Statistics' issued by the Commonwealth Statistician, copies of which are available free of charge from the Western Australian Office at the address shown on page 89.
